Our Blackbox Initiative

Our IP Protection Initiative:

Our Blackbox concept is an extension of our process. At SVV we have all the necessary engineers/facilities/infrastructure to conceal everything under 'one-roof'. This completely eliminates the need to share too much sensitive information with 3rd party vendors.

From concept to mass production, we minimize the amount of data shared among 3rd party vendors, by concealing the development process within SVV's facilities. We have in-house engineering teams, in-house prototyping teams, and a fully functional tier-1 manufacturing workshop and equipment, etc.

Our 24/7 Surveillance:

Our office building, facilities, and manufacturing lines are constantly monitored by CCTV 24/hours a day.

Onsite Security Guards:

There are onsite security guards patrolling the facility day and night, ensuring there is no unauthorized personnel.

Facial Recognition Barriers:

We have facial recognition barriers as a security measure to repel unauthorized personnel from entering the lobby area.

Security Badges / Scanners:

Our staff only have access to areas they have been given authority to. Our staff are issued with a security badge with limited use.
